

Islamabad, Sept 30th, 2024

Dear Member of the Green Youth Movement Club,

I would like to express my utmost appreciation for the incredible work being carried out by the Green Youth Movement Club in raising awareness about the pressing issue of climate change and other environmental concerns.

In the face of monumental challenges posed by climate change, it has become increasingly evident that the delicate balance of our planet's ecosystem is on the verge of collapse. Each passing day brings with it a stronger impact of human activities on the climate, manifested through changing weather patterns, rising temperatures, and more frequent extreme weather events.

Given the gravity of this situation, it is imperative that immediate action be taken to secure the future of our planet. The well-being of future generations depends on the decisions we make today. It is crucial for individuals from all walks of life to actively participate in combating the disruptions caused by climate change.

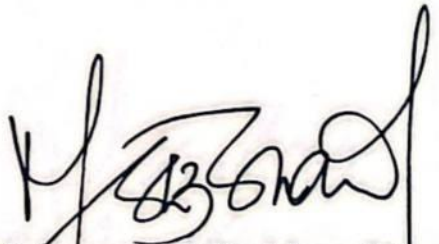

Despite Pakistan's minimal carbon footprint, it is one of the countries most severely affected by the destructive consequences of climate change. From the snow-capped peaks of Karakoram to the arid deserts of Thar, our biodiversity and ecosystems are highly vulnerable to the impacts of climate change and environmental hazards.

We must acknowledge that climate change is not a distant threat, but an alarming reality that demands swift action. However, amidst these challenges, lies an opportunity for transformation. I urge each member of the Green Youth Movement Club to educate themselves on climate science and take decisive action within their communities. Whether it be through tree planting initiatives, advocating for sustainable practices, or holding leaders accountable for their environmental policies, your efforts are instrumental in shaping a sustainable future.

The Green Youth Movement Project, as part of the Youth Programme, aims to empower you with the necessary tools to effectively address the issue of climate change. Through green competitions and idea platforms, this project strives to equip you with the knowledge and skills needed to drive meaningful change within our communities. Additionally, it provides an international platform to learn from the best practices of other nations, broadening your perspective and enabling impactful community action.

Let us seize this opportunity together to create a greener and more resilient future for ourselves and the generations to come.

With warm regards,

(Muhammad Shehbaz Sharif)
