TO WHOM IT MAY CONCERN

It's my pleasure to provide this letter of experience to **Mr. Muhammad Haris**, who served as an excellent research intern in the **Functional Genomics & Plant Tissue Culture Lab**, Department of Bioinformatics and Biotechnology. During his internship from January 24, 2023, to **June 28, 2024**, he consistently demonstrated an excellent grasp of a variety of techniques essential to our work. His dedication and positive attitude made him a valuable member of our team, and he quickly proved his proficiency in both theoretical concepts and practical applications across multiple disciplines.

Mr. Haris actively participated in numerous hands-on research activities, showcasing his skills in several key areas. In Plant Tissue Culture, he was proficient in media preparation, aseptic techniques, and the delicate processes of callus induction and maintenance of maize immature embryos. He also contributed significantly to developing optimized protocols for our lab. Furthermore, his work in Molecular Biology included DNA extraction, quantification, PCR, agarose gel electrophoresis, and RT-PCR. In the field of Bioinformatics, he applied his knowledge to primer designing, in-silico PCR, in-silico cloning, and phylogenetic analysis.

We wish him all the best in his future endeavors and are confident he will be a valuable asset to any organization he joins.

Dr. Farrukh Azeem
Associate Professor
Department of Bioinformatics and Biotechnology,
Faculty of Life Sciences,
GC University Faisalabad, Pakistan
